

The Enjoy Remote unit comes in two versions designed to cover a number of different spaces: Enjoy Remote and Enjoy Remote Plus. They differ in the number of pumps. The more powerful model has four pumps and the traditional model has two.

ENJOY REMOTE

Nebulizer systems

This compact and silent diffuser is equipped with a CVC system (Cooling, Ventilation, Heating) and runs the cold nebulizer protocol providing evenly released diffusion for up to 1800m³. It connects directly to the installed air conditioning unit, and is therefore Totally invisible.

Activating the system is triggered by GPRS remote control for modulating perfume intensity as well as diffusion times. Any alerts in the event of outage are received through the same channel. An application is available which you may download onto a smartphone, a tablet or a computer. Alternatively, we can provide that service for you.

Both models are suitable for coverage of areas such as public spaces, hotel lobbies, spas, shops.

■ TECHNICAL SPECIFICATIONS

Height :	21 cm	Modem GPRS
Width :	34 cm	Coverage/Volume in a closed environment: up to 1800 m ³
Depth :	12 cm	Technology exclusive to Scent Company
Weight :	4 kgs	Made in Italy
Material :	Steel	Easy to install
Flow :	11 l/m	Cost effective perfume consumption
Pression :	1 bar	Online software management and monitoring
Voltage :	100-230 VAC	Perfume level indicator with replacement alert
Frequency :	50/60 Hz	Remote intensity and schedule programming
Input :	12 V	Consumption report and inventory recharge calculation
		2 external Venturi systems for connecting to CVCA ducts.
